

## SENIOR SOFTWARE ENGINEER

Bustle.com is looking for full-time engineers to help build our publishing platform. You'll have the opportunity to write code executed by millions of users every month, and growing rapidly.

### Coding challenges at Bustle include:

- Build highly-performance Rails and Node.js APIs.
- Architect efficient data access using Redis, Elastic Search, Hadoop, and Sphinx.
- Use and improve our real-time analytics system for similar content identification and suggested content algorithms.
- Automate and deploy with Chef and AWS Opsworks.
- Build and scale a highly trafficked single-page javascript application.

### What we're looking for:

- An intuition about performance
- A keen eye for good API design
- Easy going, good attitude

### Tools we love:

Rails, Node.js, Ember.js, Redis, Sphinx, Elastic Search, Chef, AWS Opsworks

*You'll get to work in the sunny Bustle Labs office  
just off of the Bedford L train in Brooklyn, NY.*
